

After School Clubs

Exploration and Fun

We are pleased to offer many exciting and interesting clubs each term. These clubs are offered during the after school hours throughout the week and are available to all students. The following is a sample of some of the clubs that we have offered throughout the school year.

Martial Arts

Martial Arts for Montessori hosts this fun and active program. The basic skills of martial arts are introduced and practiced each week during this interactive program.

Exciting Engineering

The 'Kids Fun Factory' has hosted many different programs at our school. One of these clubs includes topics such as engineering. Students have the opportunity to build and explore a variety of engineering problems each week.

Dinosaurs

The 'Kids Fun Factory' has also hosted a digging for dinosaurs program. This club offers students the opportunity to explore the world of dinosaurs and fossils.

Zumba Kidz

Zumba instructors host this energizing program. Students have the opportunity to dance and exercise during this lively program.

Mad Science

The scientists from Mad Science lead the children through weekly science experiments. The children are always eager to participate during these hands-on demonstrations.

Pilates and Aerobics

The coaches from Stretch and Grow host these clubs. These clubs emphasize fitness, fun and flexibility during each class.

Hip Hop Dance

This club introduces children to the fun of dance. Throughout the program a variety of different dance moves are taught culminating in a final dance routine.

Line Dancing Club

Students enjoy learning the basic moves of line dancing while listening to country music.

Italian Club

Students are introduced to basic Italian vocabulary through songs and games.

Spanish Club

Songs and games are used to introduce children to basic Spanish vocabulary.

Nature Club

Students join this club to learn about the wonders of the seasons. Songs and games are used to provide a hands-on opportunity to learn about trees, flowers, and animals.

Rainforest Explorers

Children learn about the many different types of plants, flowers, insects and animals that are found in this unique habitat.

Volcanoes

The wonder of volcanoes and how they are formed is studied during this program. Students also build their own active volcano.

Cooperative Games

This lively and fun club involves a variety of group games and activities with a focus on working together to problem solve.
